

## How to Login to the New Student Orientation Course

Point Online works best in Chrome or FireFox as your browser. Internet Explorer does not work well and will not support items such as videos. You will need to install one of these browsers before you access the online Orientation course.

1. **Log in to the [Single Sign-On \("SSO"\) portal](#).** Within 48 hours of your acceptance to Point University, you will receive your credentials to log into the SSO portal. (If you have trouble, contact [itsupport@point.edu](mailto:itsupport@point.edu).)

2. **Click the "Point Online" tile.** After Point Online (also called "Sakai") loads, click on the "Sites" button (red circle #1 below) to see a list of your current session courses. (The label below by red circle #2 is a sample only; your session will be accurate.)

# Point University

3. **Open APSP 100 by clicking the course URL (red circle #3).** Mark this as a “favorite” link by clicking the star emblem in your browser. Orientation is designed to be self-paced. Navigate through the tabs on the left-hand side of the course.
